DETAILED ACTION

Prosecution Reopened

1. A new non-final rejection follows. It differs materially from the final rejection mailed on 16 December 2004 in that a new part of the Ring reference (p. 317) has been made of record. The rejection under 35 USC § 101 has also been withdrawn.

Claim Rejections - 35 USC § 102 and 35 USC § 103

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 77, 78, 81 and 82 are rejected under 35 U.S.C. 102(b) as being anticipated by Ring.
5. Ring teaches (independent claims 77 and 81) a method for identifying potential buyers of real estate, comprising the steps of: receiving intent data from a potential buyer in the form of a proposed real estate contract of sale (pp. 71-73); determining the price of said real estate, which reads on a reward for the potential buyer based on the intent data, in which the reward/price comprises money for the potential buyer¹; receiving a payment identifier of a financial account in the form of a check for the amount of the deposit on contract/earnest money (pp. 76-77); issuing the reward to the buyer by transferring title to the property for the contract price at closing; and applying a penalty to the financial account of the potential buyer, in the form of keeping the potential buyer's deposit on contract/ earnest money, if the

buyer does not purchase the real estate item within a particular time period. For claim 81, the confirmation signal is received at closing. For claim 81, Ring also teaches (p. 317) dropping the asking price to increase the *possibility of making a deal*, which reads on a reward offer based on a degree of certainty.

6. Ring also teaches claims 78 and 82 (p. 76).
7. Claims 79, 80 and 83-88 are rejected under 35 U.S.C. 103(a) as obvious over Ring et al.
8. Ring et al. does not teach (claims 79 and 80) a partial penalty for purchase of a similar item. Such a situation occurs when the contract of sale was signed with a builder offering multiple properties, and the buyer wanted to change the property to be purchased. Because it would help the builder retain a satisfied customer, it would have been obvious to one of ordinary skill in the art, at the time of the invention, add a partial penalty for purchase of a similar item to the teachings of Ring et al.
9. Ring et al. does not teach (claims 83-85) a partial penalty for purchase after the particular time period. Since the contract of sale is a negotiated instrument, the seller may readily agree to proceed with a late sale for some additional consideration that would read on a partial penalty. Because it would enable both buyer and seller to conclude the agreement satisfactorily, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to add a partial penalty for purchase after the particular time period to the teachings of Ring et al.
10. Ring does not teach (claims 86-88) recursive negotiation of the contract terms (step (g) in claim 86). The contract of sale (pp. 71-73) has many blanks requiring specification. Because it is the most efficient means to have two parties come to agreement on these many unspecified details, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to add recursive negotiation of the contract terms (step (g) in claim 86) to the teachings of Ring et al.
11. Claims 89 and 90 are rejected under 35 U.S.C. 102(b) as being anticipated by Abecassis (US005426281A). Abecassis teaches a central server system (*Transaction Protection*

¹ There is a reward if the seller agrees to accept a price lower than the seller's listing price (p. 317). The difference between listing and contract prices is a discount that reads explicitly on money for the potential buyer, said discount to be received at closing.

System, col. 3 lines 5-6, col. 4 lines 59-61 and Fig. 1A), comprising a processor (*computer(s) at deposit protection service center 40*, col. 5 lines 65-66 and col. 6 lines 17-18); a storage device coupled to the processor (*memory contained in the computer system of center 40*, col. 9 lines 8-10); and software operative to run on the processor provide an escrow service assuring that the deposit on contract/earnest money [*monies (deposit) that are tendered by an individual or business entity (e.g. buyer)*] is released to the seller of real estate, and title to said real estate is transferred to the buyer in part because of this consideration, in accordance with the terms of a contract of sale, said contract of sale and fulfillment of its terms reading on demand information, and said transfer of title to the buyer reading on issuing a reward to the potential buyer in exchange for demand information, wherein the software is operable to direct the processor to transfer the deposit on contract/earnest money to the seller if buyer fails to fulfill the terms of the contract, which reads on charging a penalty to a financial account of the potential buyer (col. 2 lines 45-57 and col. 3 lines 9-16).
